About us

Public Health 2025

The "3rd International Congress on Public Health" (Public Health 2025) is set to take place from November 27-28, 2025 at Paris, France. This edition will offer a hybrid experience, allowing participants to join both physically in Switzerland and virtually from anywhere in the world and collaboration under the theme of "Exploring the Innovations in Public Health."

This prestigious conference aims to foster progress in public health by creating a global platform for sharing knowledge, presenting cutting-edge research, and driving actionable strategies for population health improvement.

Warm Regards,
Public Health 2k25
Organizing Committee

Why Attend:

- Engaging sessions focused on innovation and impact: Attendees will be able to tailor their conference experience with sessions covering a wide spectrum of public health challenges, solutions, and advancements—from global health policies to community-based interventions.
- Dynamic exhibit hall showcasing the latest in public health technologies and research: Connect with industry leaders, academic experts, and organizations driving the future of healthcare delivery and disease prevention.
- Premier pre-conference workshops and symposia: These sessions offer in-depth learning experiences that will transform the way attendees approach public health research, practice, and education.
- New and interactive events: Participate in unique experiences like the Innovation Hub—a space to brainstorm scalable health solutions—and networking events that foster global collaboration and support bold, community-driven visions.
- A vibrant and inspiring atmosphere: From thought-provoking keynote addresses to cultural events in the heart of Paris, this conference promises not only professional growth but also an unforgettable experience filled with inspiration and connection

Benefits of Attending:

- Network with public health experts, researchers, and global change-makers from leading health organizations and academic institutions.
- Gain insights into high-impact strategies for managing public health crises, improving healthcare access, and addressing social determinants of health.
- Understand how to build healthier communities, improve health literacy, and align with global public health goals such as the Sustainable Development Goals (SDGs).
- Celebrate public health achievements and contribute to collaborative efforts driving sustainable, evidence-based health solutions
